Eldon Gabriel

has successfully completed the online, non-credit Specialization

Cybersecurity Risk Management Framework

Gain an understanding of NIST cybersecurity fundamentals. You will learn about the RMF process and managing risk by identifying, assessing and responding to risk. Additionally, you will learn how to use the framework to assess an organization's cybersecurity risk and the steps to implement or improve a cybersecurity program. You will deep dive in to the NIST 800-171 document where you will learn how to understand each of the 110 requirements and how to satisfy each of them. You will learn how to create a Body of Evidence (BOE) including Organizational Policy or Procedures; a System Security Plan (SSP) and Plans of Action and Milestones (POAM). Upon completion, you will have the knowledge and skills to implement the controls required by the NIST 800-171 framework and build your BOE.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
